

About Us

Founded in 2025 by **Sudhan Ponnuthurai**, a mobile industry expert with over a decade of experience, Sudhan Mobiles was created to solve a **growing problem** — kids being consumed by smartphones.

Seeing how endless scrolling and social media were **harming focus**, Sudhan set out to build something different: a safe, **distraction-free phone** for students.

The result? The Students Mobile SM81 — **no social media, no video platforms**, just essential tools and brain-boosting games.

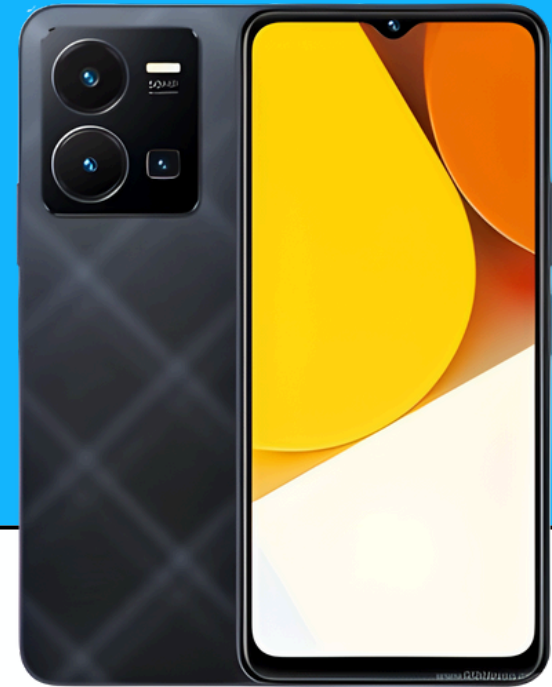

Based in Singapore, we're proud to empower **families, educators, and schools** with tools that support young minds — not distract them.

Because we believe focus is freedom.

Students Mobile SM-81

Designed for focus. Built for growth.
Trusted by parents.

Too Many Distractions, Too Little Focus

Social media. Endless videos. Uncontrolled screen time.

Today's smartphones weren't made for students — they're made to **grab attention**. That's why the **Students Mobile SM81** comes in.

We help parents, educators, and coaching centers **protect young minds** from distractions and unlock focused learning through responsible technology.
